

Judge's Evaluation Rubric: Inter-University National AI Hackathon

Part 1: Technical Implementation & Execution

Evaluates the core development, AI integration, and functionality within the 6-hour window.

Criteria	Level 0 (Not Evident)	Level 1 (Limited)	Level 2 (Developing)	Level 3 (Proficient)	Level 4 (Exemplary)
Problem Solving & AI Use	No AI/ML components used; rule-based only (Disqualified).	Minimal AI integration; model does not address the core problem effectively.	AI model is functional but lacks optimization or relevance to the problem statement.	AI/ML model addresses the core problem well with appropriate framework choice.	Innovative use of AI/ML that solves the core problem with high precision and relevance.
Technical Execution & Code Quality	Prototype fails to run or contains major execution errors.	Prototype runs but is highly unstable with frequent bugs.	Core logic is functional but code quality is poor or disorganized.	Professional code quality; runs smoothly with minor, non-critical bugs.	Exceptionally clean, optimized code; prototype is robust and runs without bugs.
UI/UX & Interface	No functional UI provided.	UI is difficult to navigate or fails to showcase the AI features.	Basic interface provided but lacks aesthetic appeal or intuitive flow.	Clean and usable interface that demonstrates the AI results clearly.	Highly professional, intuitive, and polished UI that enhances the overall AI demo.

Part 2: Presentation & Professionalism

Assesses the team's ability to pitch their solution and provide required documentation.

Criteria	Level 0 (Not Evident)	Level 1 (Limited)	Level 2 (Developing)	Level 3 (Proficient)	Level 4 (Exemplary)
Presentation & Pitch	No demo or pitch provided	Pitch is unclear or exceeds the	Covers the solution but lacks a clear	Clear 3-minute pitch	Compelling and professional

	.	3-minute time limit significantly.	explanation of the problem or impact.	covering problem, solution, and impact.	pitch; demonstrates deep insight into the solution's impact.
Documentation & Deliverables	Missing repository link, README, or video demo.	Documentation is incomplete or contains incorrect setup instructions.	All deliverables present but README lacks detail for easy reproduction.	Well-documented README with clear setup instructions and repository structure.	Exceptional documentation; repository is perfectly organized and "ready-to-deploy".

Judge's Final Remarks:

Scoring Summary:

- Total Marks: Based on specific weightage assigned to each category during the demo.
- Decision: All judges' decisions are final.
